Summary

Dynamic Frontend Developer with nearly a year of experience in crafting responsive and mobile-first websites. Proficient in HTML5, CSS3, and JavaScript, complemented by certifications in JavaScript Development and Full Stack Engineering. Successfully designed intuitive user interfaces and built robust front-end architectures using frameworks like React and Angular. Adept at collaborating with clients to ensure user-centric solutions, eager to leverage expertise to enhance digital experiences for prospective employers.

Work Experience

Freelance/Frontend Developer, Upwork, Gevgelija, North Macedonia

11/2022 – Present

- Crafted responsive, mobile-first websites employing HTML5, CSS3, and JavaScript, ensuring compatibility across diverse devices and screen sizes.
- Conceptualised intuitive and visually appealing user interfaces by designing wireframes, prototypes, and high-fidelity mockups using tools such as Figma, Sketch, and Adobe XD.
- Developed robust and scalable front-end architectures with frameworks like React, Angular, and Vue.js, applying best practices for performance optimisation and accessibility.
- Facilitated cross-browser compatibility by ensuring seamless functionality across different browsers and platforms, conducting thorough testing and debugging to deliver flawless user experiences.
- Collaborated closely with clients to understand their requirements and translate them into functional web solutions.

Education

Certified JavaScript Developer, Frontend JavaScript Development, ITAcademy by LINKgroup, Belgrade, Serbia

11/2022 – 09/2023

- Mastered HTML5, CSS3, and JavaScript for responsive, accessible web applications.

Certified Full Stack for Front-End Engineers, Frontend Masters, Minneapolis, MN, United State

08/2024 – 09/2024

- Completed an intensive course focused on integrating frontend expertise with full-stack development, enhancing the ability to build seamless, high-performance web applications.
- Connected frontend and backend via RESTful APIs for efficient data exchange.
- Secured applications using JWT and OAuth for robust user authentication.
- Streamlined development environments with Docker and Vagrant for consistency across deployments.
- Built and deployed full-stack web applications utilising Node.js, Express, and MongoDB.
